# Fineco - a fully independent public company

## Strategy and Business model

**Fineco exit from the UniCredit Group has no implications on its strategy and business model:** Fineco enjoyed limited synergies with UniCredit and, as a fully independent company, continues to **focus on maximizing shareholders' value via healthy, sustainable and organic growth**

## Transitional Arrangements with UniCredit Group

**Fineco and UniCredit have agreed to enter into certain transitional arrangements to ensure full continuity and an orderly and smooth transition from a regulatory, liquidity and operational standpoint**

### INVESTMENT STRATEGY

- **No change in the investment policy** envisaging an increasing diversification of financial investments as the existing stock of UniCredit bonds, currently at around €7.5bn<sup>(1)</sup>, progressively runs off by 2024

### INFRAGROUP SERVICES

- **UniCredit has granted a financial collateral** in favor of Fineco to secure the credit risk exposures towards UniCredit and **neutralize the capital impacts and risk concentration limits**

### TRADEMARK

- **UniCredit will continue to provide, on an interim basis, certain services** in order to allow Fineco to act in full operational continuity. **The contract for customers' access to banking services through smart ATMs and physical branches has been extended for 20 years**

- **Fineco has decided to exercise by the end of 2019 the option for the purchase** - at the **price of €22.5mln plus VAT** - of its brand, currently owned by UniCredit

## Benefits from being a fully independent public company

- **More liquid stock** with more than doubled average volumes
- **Increased efficiency** as we now are **more flexible and agile** to adapt to a fast changing environment in terms of:

**More freedom** in terms of marketing strategy, **tone of voice** and **communication on social media** (very important for Brokerage)

Possibility to fully exploit our **operational efficiency** to offer **a better customer experience** with more flexibility (e.g. Strong Customer Authentication)

**Improved efficiency and flexibility** in our decision making, with **no need to increase risk profile**

## **Fineco Results**

IFRS16: the Bank decided to not disclose comparative data from previous periods, as allowed by new accounting standards.

No effect was recorded in net equity on the date of first application. This is because for the purposes of FTA, the financial liabilities for leasing were valued and recorded at the current value of the residual future payments on the transition date, and the corresponding assets consisting of the right of use were valued at the amount of the financial liability plus the advanced leasing payments recorded in the financial situation immediately prior to the date of initial application (31st December, 2018).

<sup>(1)</sup> Due from banks includes 1.2bn cash deposited at Bank of Italy as of June 2019 and 1.2bn cash and 0.2 bn compulsory reserves deposited at Bank of Italy as of Sept. 2019
