2024 Guidance: improved outlook, record Net Profit expected

Our diversified business model key to successfully deal with the current volatile environment

Revenues

- **REVENUES** expected in FY24 at a record level, with an improvement of the mix in favour of commissions thanks to:

- **o/w INVESTING REVENUES:** expected to increase low double digit in FY24 vs FY23 (with neutral market effect going forward). For FY25 expected to increase low double digit vs FY24 (with neutral market effect going forward)
- **o/w BANKING FEES:** expected stable in FY24 and with a slight decrease in FY25 due to the new regulation on instant payments
- **o/w BROKERAGE REVENUES:** expected to remain strong with a continuously growing floor thanks to the enlargement of our active investors

Costs and provisions

- **OPERATING COSTS:** expected growth of around 6% in FY24 vs FY23, not including additional costs mainly for: FAM and marketing expenses. For FY25 expected growth of around 6% y/y, not including additional costs for growth initiatives
- **COST / INCOME:** in FY24 and FY25 comfortably below 30% thanks to the scalability of our platform and strong operating gearing
- **COST OF RISK:** in a range 5-10 bps in FY24 thanks to the quality of our portfolio

Capital

- **CAPITAL RATIOS:** in FY24 growing CET1 and Leverage Ratio. On Leverage Ratio our goal is to remain above 4.5%
- **DPS:** for FY24 we expect a higher dividend per share. On excess capital distribution, we are going to take more time as the probability of a higher-than-expected business growth is increasing
